Ignition lock cylinder assembly for cars with transponder – **C-30-171**

VOLKSWAGEN

There is a new keying kit required for the new style tumblers with notches on the top and bottom. These tumblers have been used on some models beginning in 2002, and are being found in most 2003 model cars. PLUS, these tumblers are being found in new replacement locks for older model cars. Until this new keying kit is ready, you can file the notches by hand in the tumblers from the A-31-306 keying kit and the A-13-105 keying kit. We hope that this new kit will be ready by the end of 2002, watch for more information.
