

BMW REAR COMPARTMENT LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers.
3. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.
4. In model changeover years there may be 2 different versions of the same car name sold as the same year model. The different versions are designated by the model code (such as 3-series E21). You can use the keyway as another way to check.
5. For models not listed replacement parts are available from BMW dealers only. Most of those have remote release only,
