

CHEVROLET REAR COMPARTMENT LOCKS

General information as follows:

1. For applications before 1967 (B10 & B11 keys) see the separate section.
2. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
3. Unless specified otherwise all locks using single sided keys GM-A through GM-K have universal groove that will accept all 8 keyway variations. These locks will not accept the pre-1967 B10/B11 keys.
4. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.

			NOTE: The TL1576 / TL1576U lock with grooves for horizontal clip installation is officially the correct lock to use, as the lock installs on the car body, not the trunk lid. Some cars were manufactured using the vertical clip design lock, which is TL1575 / TL1575U. Try the TL1576 / TL1576U first, if it does not line up properly then use the vertical lock TL1575 / TL1575U.

Which tumblers and keying kits to use:

The chart below lists which tumblers and keying kits to use according to which key blank the lock uses.

General Motors is different from most other car manufacturers because locks using the same keyway may use different tumblers depending upon who manufactured the lock and in some cases when it was manufactured. Also some replacement locks may use tumblers different from the lock installed on the car when it was built and which are not available from any known source. As such these tumbler references are correct only to the extent of information that is available to us.

To help avoid confusion, whenever possible the year and model section includes which tumbler series to use in the notes section.
