

CHRYSLER DOOR LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. Unless specified otherwise pawls are not included with replacement locks, the original pawls must be reused.
3. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.
4. Remember – Driver side is LEFT, Passenger side is RIGHT
5. If a specific model that you need is not listed here, try the Dodge, Eagle, Plymouth, and Ram sections. Some cars, especially those sold new in Canada or Mexico or other countries, used the Chrysler brand instead of the other brands which are used in the USA.

NOTE: To simplify lookup and avoid confusion this section is divided into several sections as follows:

Locks using single sided keys up to 1990

Locks using double sided keys

Tumblers, springs, and keying kits are listed at the end of the file sorted by the key blank used.

Locks using single sided keys up to 1990

Model	Years	Key	Part description	Part no.	Part description	Part no.	Notes
Some models with door lock separate from the door handle (Locks which fit into the door handle are not available)	1960-65 Cars	Y152	Lock set 2 door locks plus ignition lock	S-44-101			
			Door locks as in the picture have 1.34 inch diameter face				
			Vehicles with this design door lock are best serviced with a 3-piece lockset ignition + 2 door locks because of variations in keyways for pre-1968 model vehicles. Current production ignition locks cannot be rekeyed to the pre-1968 original key. Using the 3-piece lock set preserves the original matched locks on the vehicle. Door lock pair without the ignition lock is available as part no. DP-44-102 but these locks cannot be rekeyed to a pre-1969 original key. Some vehicles use a similar design lock with the pawls inverted and cannot be serviced with this lock set. The pawls on these door locks are permanently attached to the end of the plug.				
Caravan or Town & Country	1984-90	Y152	Coded pair with pawls	DL1502			
With lighted keyhole	1970-89	Y152	Coded pair	DL1533			NOTE: This lock is now available only with black face and does not include pawls.

CHRYSLER DOOR LOCKS

Which tumblers and keying kits to use:

The chart below lists which tumblers and keying kits to use according to which key blank the lock uses.

Chrysler is different from most other car manufacturers because locks using the same keyway may use different tumblers depending upon the code series and when it was manufactured. As such these tumbler references are correct only to the extent of information that is available to us.

The tumbler series used for each specific year and model application is listed in the notes section of the main lock application chart.
