

FORD REAR COMPARTMENT LOCKS

Important: For pin tumbler locks using single sided H26 type keys see the separate section Ford Rear Compartment Locks 1952-66.

Also see the separate Ford Trucks section for Pickups and Vans. Sport Utility Vehicles such as Bronco, Escape, Explorer, Expedition, and Excursion are in this section.

This section contains only information about pin tumbler locks using double sided keys, 10-cut, and 8-cut wafer tumbler locks using double sided keys.

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. We supply coded or uncoded according to what is available to us from the manufacturer. All coded cylinders can be disassembled for rekeying, using the tumblers and keying kits listed. Coded locks may be substituted for locks listed as uncoded. Uncoded locks will never be substituted for locks listed as coded.
3. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers.
4. The dual part numbers for the same applications are the same part numbers at the same price. The number beginning with TL are Lockcraft part numbers. The ASP format part number (such as beginning with B-42-) are from the days when ASP sold only the original Ford production parts made by Hurd in Tennessee.
5. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.
