

INFINITI IGNITION LOCKS

General information

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers.
3. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.
4. Nissan / Infiniti ignition locks have a casting number on the outside of the lock housing. There are many different minor variations in this range of locks, mostly in the electrical connections. In order to simplify the availability of replacement parts we have grouped the locks available from ASP by casting number. Future sales of complete locks will be the housing and cylinder of each casting number without electrical switch. Electrical switches will be sold separately whenever possible. Also cylinder repair kits will continue to be available whenever possible.

INFINITI IGNITION LOCKS

Tumbler springs:

Over the years we have sold tumbler springs under several different part numbers. As there are very minor differences between the springs used in most Japanese and Korean locks, we have consolidated the various springs as follows:

P-00-100 - currently active part number - 100 springs per pack

Part numbers previously used, now superseded to P-00-100

P-16-105	P-30-108
P-19-100	RP6546
P-20-105	RP6612
P-20-115	RP6731
P-24-105	RP6822
