

# JEEP IGNITION LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.

## Which tumblers and keying kits to use:

The chart below lists which tumblers and keying kits to use according to which key blank the lock uses.

Chrysler / Jeep is different from most other car manufacturers because locks using the same keyway may use different tumblers depending upon the code series and when it was manufactured. As such these tumbler references are correct only to the extent of information that is available to us.

The tumbler series used for each specific year and model application is listed in the notes section of the main lock application chart.
