

MITSUBISHI DOOR LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers.
3. Note the following terminology:

“Lock Service Package” may come coded or uncoded and includes a face cap when applicable. In some cases a coded lock may be substituted for applications listed as uncoded, but an uncoded lock will never be substituted for an application listed as coded. The original pawl may need to be reused on some applications. A pawl may be included with the lock but it may not be the correct one for every application.

“Complete Lock” is a coded lock including the correct pawl for the listed application.

Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.

4. Note also that there are some applications where it will not be possible to rekey to the original car key because either the tumblers or the lock with the exact keyway are no longer available. We try to provide as much as possible to at least get the car back in service for the owner even if matching the original key is not possible. Be sure to read all the way through the notes for information to help you do as much as possible to service your customer using parts that are still available.

IMPORTANT: RIGHT SIDE (RH) is the PASSENGER SIDE, LEFT SIDE (LH) is the DRIVER SIDE. If only one part number is listed, that part number can be used on either side.

Tumbler springs:

Over the years we have sold tumbler springs under several different part numbers. As there are very minor differences between the springs used in most Japanese and Korean locks, we have consolidated the various springs as follows:

P-00-100 - currently active part number - 100 springs per pack

Part numbers previously used, now superseded to P-00-100

P-16-105	P-30-108
P-19-100	RP6546
P-20-105	RP6612
P-20-115	RP6731
P-24-105	RP6822
P-30-105	

Tumbler springs for Y160 Chrysler design door locks:

RP7595 - 50 springs per pack
