

MITSUBISHI IGNITION LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. Locks are only available coded with keys unless noted otherwise.
3. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock

Model	Years	Key	Part description	Part no.	Part description	Part no.	Notes
3000GT	1990-99	MIT1	Coded cylinder automatic transmission ("NO PUSH")	C-22-117	Coded cylinder manual transmission ("PUSH")	C-22-116	IMPORTANT: See note below
			In general when there is a different lock listed for manual and automatic transmission, the lock for manual transmission will have the word "PUSH" embossed on the face, signifying that the key pushes in when turning the cylinder. The lock for automatic transmission will not push in when turning the key and does not have the word "PUSH" embossed on the front. However some cars, especially the 3000GT and similar Dodge Stealth, have been found to use the opposite of what is generally correct. To be sure look for the word "PUSH" embossed on the front of the lock being removed from the car, if it is there use C-22-116, if it is not there use C-22-117. C-22-116 and C-22-117 are not interchangeable.

Tumbler springs:

Over the years we have sold tumbler springs under several different part numbers. As there are very minor differences between the springs used in most Japanese and Korean locks, we have consolidated the various springs as follows:

P-00-100 - currently active part number - 100 springs per pack

Part numbers previously used, now superseded to P-00-100

P-16-105	P-30-108
P-19-100	RP6546
P-20-105	RP6612
P-20-115	RP6731
P-24-105	RP6822
P-30-105	

Tumbler springs for Y160 Chrysler design ignition locks:

RP6981 - 50 springs per pack
