

NISSAN (DATSUN) DOOR LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. We supply coded or uncoded according to what is available to us from the manufacturer. All coded cylinders can be disassembled for rekeying, using the tumblers and keying kits listed. Coded locks may be substituted for locks listed as uncoded. Uncoded locks will never be substituted for locks listed as coded.
3. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers.
4. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.
5. RIGHT SIDE (RH) is the PASSENGER SIDE, LEFT SIDE (LH) is the DRIVER SIDE

Tumbler springs:

Over the years we have sold tumbler springs under several different part numbers. As there are very minor differences between the springs used in most Japanese and Korean locks, we have consolidated the various springs as follows:

P-00-100 - currently active part number - 100 springs per pack

Part numbers previously used, now superseded to P-00-100

P-16-105	P-30-108
P-19-100	RP6546
P-20-105	RP6612
P-20-115	RP6731
P-24-105	RP6822
P-30-105	

For Ford design locks using H54 keys (10-cut design)

P-42-140 (formerly RP6656) - 100 springs per pack

For Ford design locks using H75 keys (8-cut design)

RP5043 - 100 springs per pack
