

PLYMOUTH REAR COMPARTMENT LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.

Up to 1989 except imports							
Model	Years	Key	Part description	Part no.	Part description	Part no.	Notes
Most models	1959-65	1764S	Coded lock	B-44-103	Except cars with pushbutton design lock. B-44-103 is supplied without the shaft. Try various General Motors trunk lock shafts if needed. Disassembly and rekeying of this lock is not recommended.

Which tumblers and keying kits to use:

The chart below lists which tumblers and keying kits to use according to which key blank the lock uses.

Chrysler is different from most other car manufacturers because locks using the same keyway may use different tumblers depending upon the code series and when it was manufactured. As such these tumbler references are correct only to the extent of information that is available to us.

The tumbler series used for each specific year and model application is listed in the notes section of the main lock application chart.
