

PORSCHE LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank transponders, the main object is to identify which key profile enters the lock.
2. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers. For models not listed check by the key blank used.
3. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.
4. Remember – Driver side is LEFT, Passenger side is RIGHT

NOTE: There is no way to be sure which tumbler series is used on a lock without disassembling it. Also some locks use different dimension tumblers that are not available, including some locks sold by ASP. Several different companies manufactured these locks which are interchangeable as complete assemblies but which the tumblers and other components do not interchange. As these are older models some variations are no longer in production because of declining usage.
