

## STERLING (TRUCK) LOCKS 1997-2009

Most Sterling trucks are based on Ford heavy duty trucks. If the truck you are working on uses Ford keys (H51, H54, or H75) see the Ford Truck sections of the Ford files.

Sterling 360 is based on the Mitsubishi Fuso truck, see the Mitsubishi section and identify tumblers to use by the keyway.

Sterling Bullet is based on Ram trucks, see the Ram Pickup sections 2007-09 model years of the Dodge files for more information.
