SUBARU DOOR LOCKS

General information as follows:

- 1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock. If a specific model is not listed, the correct tumblers to use can be identified by the key profile only.
- 2. Locks are only available coded with keys unless noted otherwise.
- 3. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers. This applies also to specific models or years not listed.
- 4. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock
- 5. Remember Driver side is LEFT, Passenger side is RIGHT

Tumbler springs:

Over the years we have sold tumbler springs under several different part numbers. As there are very minor differences between the springs used in most Japanese and Korean locks, we have consolidated the various springs as follows:

P-00-100 - currently active part number - 100 springs per pack

Part numbers previously used, now superseded to P-00-100
