

TOYOTA REAR COMPARTMENT LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. Locks are only available coded with keys unless noted otherwise.
3. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers.
4. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.
5. Note also that there are some applications where it will not be possible to rekey to the original car key because either the tumblers or the lock with the exact keyway are no longer available. We try to provide as much as possible to at least get the car back in service for the owner even if matching the original key is not possible. Be sure to read all the way through the notes for information to help you do as much as possible to service your customer using parts that are still available.

Tumbler springs:

Over the years we have sold tumbler springs under several different part numbers. As there are very minor differences between the springs used in most Japanese and Korean locks, we have consolidated the various springs as follows:

P-00-100 - currently active part number - 100 springs per pack

Part numbers previously used, now superseded to P-00-100

P-16-105	P-30-108
P-19-100	RP6546
P-20-105	RP6612
P-20-115	RP6731
P-24-105	RP6822
